

**Title: Does the colour of your egglu effect egg production?**

This year's National Science Week is all about colour. With this in mind we have created a highly scientific experiment to find out whether the colour of your egglu makes a difference to the amount of eggs your hens lay and even the size of them? It should produce a wonderful insight into the world of chickens and who know what we might find. You can take part by recording your chickens' egg production and sending us the results.

**Head Scientist Details**

Name .....  
Email Address .....  
Postcode .....  
Colour of egglu    Red [ ]    Blue [ ]    Green [ ]    Yellow [ ]    Pink [ ]    Orange [ ]

Your Chickens	Name	Breed	Age
Chicken 1			
Chicken 2			
Chicken 3			
Chicken 4			

The Eggs	Weight (g)				
	Hen 1	Hen 2	Hen 3	Hen 4	Total
Friday, 10th March					
Saturday, 11th March					
Sunday, 12th March					
Monday, 13th March					
Tuesday, 14th March					
Wednesday, 15th March					
Thursday, 16th March					
Friday, 17th March					
Saturday, 18th March					
Sunday, 19th March					
<b>Total Weight (g)</b>					

**You can send your results by:**

Fax: 01295 758118  
Scan and your email them to [penny@omlet.co.uk](mailto:penny@omlet.co.uk)  
Post: Omlet, Tuthill Park, Wardington, Banbury, Oxfordshire, OX17 1SD

All results must be in sent by end of March so we can start our super computer analysising the results.
